

Kenny Calhoun, GISP

Manager, GIS Services

Mr. Kenny Calhoun is the Manager of Geographic Information System (GIS) services at DBS&A.

Mr. Calhoun has more than 15 years of experience in GIS technologies, specializing in GIS applications for land use, environmental, and water resources management. GIS-related projects at DBS&A include the use of satellite imagery and historical aerial photography for land-use classifications, environmental database development, stream flow and terrain analysis, GPS-based utility mapping, and general civil engineering support for various groundwater contamination litigation, water resource, and water rights projects. Mr. Calhoun has published many articles and has given numerous presentations at GIS-related conferences.

Mr. Calhoun has served as Project Manager for many GIS projects, and has served as GIS Technical Lead on numerous litigation projects. He is currently the Project Manager for a multi-year contract to develop a comprehensive, web-accessible, GIS-based database management system. The system is for projects associated with habitat restoration, water management, and scientific investigations within the Middle Rio Grande basin for the U.S. Army Corps of Engineers and the Middle Rio Grande Endangered Species Collaborative Program. He is recognized as a qualified expert by the United States District Court and has been retained by the United States Attorney's Office to provide expert opinions on land-trespass cases.
